

Central United Life Insurance Company's

# **FirstChoice**

*Hospital Indemnity Insurance Policy*

**Guaranteed Issue\***

The **FirstChoice** in Quality  
Supplemental Health Insurance Benefits

\* *To receive Guaranteed Issue underwriting consideration, the primary insured must be gainfully employed, and working an average of 30 or more hours per week.*

## Considerations for **FirstChoice** as Stand Alone Coverage

While not a substitute for Major Medical coverage, for those unable to qualify for or *afford* Major Med, our **Platinum** and **Gold** package designs each feature a variety of both *inpatient* as well as *outpatient* benefits, and include a strong **surgical schedule** that can be accessed either in or out of the hospital, and for an **unlimited** number of times! (*Subject to a dollar limit, which varies by plan*) **FirstChoice** benefits can be paid to **Any Hospital** or **Any Doctor**, and we include access to the **Beech Street PPO Network** with both **GOLD** and **PLATINUM** plans for cost savings from repricing when Beech Street providers are used.

## Advantages of the **Defined Benefit** design of **FirstChoice**

All **FirstChoice** policies are **Defined Benefit** plans. This simply means that the policy clearly stipulates what benefits will be paid for specific conditions, and then pays these stipulated amounts **FIRST DOLLAR!** With **FirstChoice**, there are **No Deductibles** and **No Coinsurance!**

## **FirstChoice** features Individual Renewable **Policies!**

Unlike **FirstChoice**, most health insurance plans are **Certificates** and not true **Policies!**

**FirstChoice** is a

**Guaranteed Renewable Policy!**

## **FirstChoice** plans are **Guaranteed Issue!+**

+ **FirstChoice** policies are **Guaranteed Issue** for full time employees ages 18-65 (*inclusive*) who hold employment for an average of 30+ hours per week, and their spouse and dependent children may be covered as well.

## **FirstChoice** has **No Ineligible Medical Conditions!**

Certain pre-existing medical conditions can stop an individual from qualifying for traditional Major Med plans, but **Not FirstChoice!** Pre-existing conditions (*for covered medical conditions*) for which treatment was received (*or medicine prescribed*) within the 12 months prior to the policy effective date will be automatically covered beginning 12 months **AFTER** the effective date of coverage. **FirstChoice** plans have **No Permanent Exclusions**, *regardless of the severity of the pre-existing condition!*

## **FirstChoice** also has **No Ineligible Occupations!**

## Considerations for **FirstChoice** as Supplemental Coverage

In today's healthcare environment, many are forced to select **High Deductible** health insurance policy designs in an attempt to keep premiums "affordable". These plan designs can leave huge bills unpaid from a normal hospital stay, even after Major Medical plans have paid! **FirstChoice** Supplemental plan designs are often cost effective ways to **reduce** or even **eliminate** the out of pocket costs associated with an average period of hospital confinement!

Regardless of your primary health insurance selection, "**Defined Benefit**" plans like **FirstChoice** can deliver strong supplemental benefits paid directly to you that you can use for the purpose of your choice!

Consider the merits of **combining** Primary AND Supplemental Coverage;  
**it may cost much less than you think!**

While no single plan or plans is best for everyone, many are finding relief in the form of "**Packaged Benefits**," featuring **High Deductible Major Med** plans for catastrophic protection and custom tailored "**Defined Benefit**" plans to reduce or even eliminate the out-of-pocket exposure associated with hospital confinements.

This can often be accomplished with **little more premium** than is currently required for their Major Medical plan alone!

*Make certain that you ask your CUL agent about our excellent **Cancer** plans, and other fine products in the CUL portfolio!*

- \*According to the American Cancer Society, **1 in 2** men and **1 in 3** women will get **CANCER** in their lifetime!
- \*That's one every **24 SECONDS!** **1 in 4** deaths is from **CANCER**, and each year another 1,200,000 folks are diagnosed!
- \***1 in 6** men will develop **PROSTATE CANCER** and **1 in 7** women will develop **BREAST CANCER!**
- \*They also say that **65%** of the cost of treating Cancer will **not be covered by Major Medical Insurance!**

\* Every year, another 1,200,000 people are diagnosed with **Cancer!** +

\* 1 out of 6 men will develop **Prostate Cancer**

\* 1 out of 7 women will develop **Breast cancer!** +

\* 65% of the cost of treating **Cancer Is Not Covered** by Major Medical Insurance! +

+ Cancer Facts and Figures, 2008

\* In 2006, 631,636 people died of heart disease. Heart disease caused 26% of deaths—more than one in every four—in the United States.<sup>1</sup>

\* Heart disease is the leading cause of death for both men and women. Half of the deaths due to heart disease in 2006 were women.<sup>1</sup>

\* Coronary heart disease is the most common type of heart disease. In 2005, 445,687 people died from coronary heart disease.<sup>2</sup>

\* Every year about 785,000 Americans have a first heart attack. Another 470,000 who have already had one or more heart attacks have another attack.<sup>3</sup>

\* In 2010, heart disease will cost the United States \$316.4 billion.<sup>3</sup> This total includes the cost of health care services, medications, and lost productivity.
